

SmallTalk in-mask microphone and mini-amplifier/loudspeaker

If you can talk with your respirator fitted, there is no need to remove it. SmallTalk is designed to make 100% wear-time possible.

No holes, no permanent attachments, no damage to your mask. SmallTalk can be fitted to your respirator in seconds, and removed without a trace.

That means there are no changes to maintenance or cleaning, either.

Description:

Voice communication device for effective speech while wearing a half mask or full face respirator. Features attachments for SEA full face masks, SMF side-mounted full face masks, Sundström SR200 full face mask, and Sundström SR100 half mask
